3.4 (no title)

0.5 / 0.5 pts

✓ + 0.5 pts Correct

+ 0 pts Incorrect

In-Class Exercise 5

Name: Jinku Jung

UNI: 2598

Use the version of Dijkstra's algorithm we saw in class to find the shortest path from A to D on the graph below. **You must fill out the included table and answer the questions in the space provided.** Please follow the in-class instructions carefully. If you do not follow these rules, the autograder will not be able to grade your work and you will not earn credit.

Fill in the table:

Node	Iteration 0	Iteration 1	Iteration 2	Iteration 3	Iteration 4
A	(0)	X	X	X	X
B	∞	15	10	(6)	X
C	∞	(3)	X	X	X
D	∞	∞	15	14	(9)
E	∞	4	(4)	X	X

Shortest Path: (A , E , B , D ,)

S = (A , C , E , B , D)

Last Update By: B E , C A , D B , E A
